## Overview

---

This guide references the most applicable requirements for the 2017 National Electrical Code (NEC), the 2018 International Residential Code (IRC), and the 2018 International Fire Code (IFC). This shift only becomes evident by reading between the lines of a new report summarizing 2017 solar policy developments and understanding the implications of its data. In 2017, there were a record 249 solar policy actions debated at state commissions and legislatures — up 17% from 2016's 212. The United States installed 4.5 GWDC of PV in H1 2017—cumulative capacity reached 45.4 GW. Analysts estimate the United States will install between 8.5GW and 12.5 GW in 2017. On September 22, the U.S. International Trade Commission (USITC ) found that the domestic U.S. module and cell manufacturing. The New Solar System was funded by a research grant from the U.S. Department of Energy (DOE). grant provided Stanford's Steyer-Taylor Center with full independence and authority to frame the inquiry, conduct the research, draw conclusions, and write this report. The following language is required. In 2012, the Office of Management and Budget (OMB) issued OMB Memorandum M-12-21 (the "OMB Memorandum") providing further guidance for ESPC ESAs, including a requirement that the renewable energy generation asset is transferred to the federal agency at the end of the contract term. These OMB rules. The solar and energy storage criteria in this guideline is based on SolSmart's National Simplified Residential PV and Energy Storage Permit and Inspection provide no-cost technical assistance to jurisdictions who want to make it faster, easier and more affordable for their communities to go solar. The 2017 triennial update of the National Electrical Code (NEC) is complete and has been released for adoption. Though AHJs may take months or years to adopt the latest edition (California won't adopt the 2017 NEC until 2020), it's important for solar contractors to know what's coming. Here's an.
