developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

equatorial guinea grid-connected or off-grid energy storage ratio

A grid-scale energy storage system is composed of three main components: the energy storage medium itself (e.g. lithium-ion batteries), a power electronic interface that connects the storage medium to the grid, and a high-level control algorithm that chooses how to operate the system based on measurements internal (e.g.
