Monocrystalline vs. Polycrystalline Solar Panels: 2024 Guide

Monocrystalline solar panels have a higher cost when comparing only the panels. The cost of inverters, wiring, electrical protections, racking and labor is the same for both solar panel types. Because monocrystalline panels are more efficient, you may get a better return on your investment.

Cost Breakdown Monocrystalline vs. Polycrystalline Solar Panels

Monocrystalline solar panels, made from a single crystal structure, typically cost more due to their higher efficiency and purity of silicon. Polycrystalline panels, comprising multiple crystal structures, are generally less expensive but slightly less efficient. Breaking down the upfront costs: Monocrystalline Solar Panels: With a more
