Clean Power Production Technologies » Babcock & Wilcox

B& W's clean power technologies include decarbonization, hydrogen production, solar, energy storage, WtE, emissions control and steam generation.

- Efficient Higher Revenue**
 - Max Efficiency 97.5%
 - Max PV Input Voltage 600V
 - 100% Peak Output Power
 - 240V Modules, 320V DC Input Overvoltage
 - Max PV Input Current 55A, Compatible with High Power Modules
- Intelligent Simple O&M**
 - IP65 Protection Degree: support outdoor installation
 - Smart ITC Error Diagnosis Function: locate PV string faults accurately and automatically detect faults
 - DC & AC Type II SPD: prevent lightning damage
 - Battery Reverse Connection Protection
- Flexible Abundant Configuration**
 - Plug & Play, EPC Switching Under 30min
 - Compatible with Lead-acid and Lithium Batteries
 - Max. 6 Units Inverters Parallel
 - ARC Function (Optional): when an arc fault is detected the inverter immediately stops operation

Babcock Power Environmental | Improve Efficiency & Operation

With nearly half a century of experience in creating highly effective new and retrofitted environmental control systems for the power industry, Babcock Power Environmental (BPE) is today the undisputed leader in helping power plants reduce their emissions while maintaining the highest levels of safety, quality and performance in every operation.
