Welcome to the official website of Hon. JoBeth Coleby-Davis, Minister of Energy and Transport for the Bahamas. As a dedicated leader, Minister Coleby-Davis is committed to advancing sustainable energy policies and modernizing transportation infrastructure across the Bahamas.

BAHAMAS

The Bahamas National Energy Policy 2013 - 2033 [7] Designed to ensure that by 2033 Bahamas has a modern, diversified and efficient energy sector, providing Bahamians with affordable energy supplies and long-term energy security towards enhancing international competitiveness and sustainable prosperity.

Tackling Poverty With Renewable Energy in the Bahamas

Capitalizing on the nation's approximately 310 days of sunshine per year, this initiative not only advances the goals for renewable energy in the Bahamas, but reduces reliance on imports and actively contributes to poverty alleviation by creating jobs, lowering the cost of living and building the community.

BAHAMAS

This document presents The Bahamas' Energy Report Card (ERC) for 2021. The ERC provides an

overview of the energy sector performance in The Bahamas. The ERC also includes energy efficiency, technical assistance, workforce, training and capacity building information, subject to the availability of data.

Government aims for minimum reliance on renewable energy of ...

The government of The Bahamas signed a contract agreement with the Caribbean Centre for Renewable Energy and Energy Efficiency (CCREEE) that will reaffirm its BluePrint for Change goal of "a minimum reliance on renewable energy of 30 percent by 2030."

1 EXECUTIVE SUMMARY

The Government of The Bahamas aims to achieve a significant renewable energy penetration by 2030 in order to replace expensive generation from fossil fuels and reduce dependency on fuel imports. According to the National Energy Plan, the target is to achieve 30% of electricity generation from renewable sources of the total generation portfolio.

Energy Snapshot Bahamas

renewable energy projects in the Bahamas. Energy Efficiency and Renewable Energy Projects With energy-related costs estimated at 15% to 20% of annual operating budgets for small- and medium-sized hotels in the Bahamas, the Bahamian hotel industry launched a significant energy efficiency initiative in 2013 in partnership

ENERGY PROFILE Bahamas

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

Executive Summary of BPL's Renewable Energy Plan

The Government of The Bahamas aims to achieve a significant renewable energy penetration by 2030 in order to replace expensive generation from fossil fuels and reduce dependency on fuel imports. According to the National Energy Plan, the target is to achieve 30% of electricity generation from renewable sources of the total generation portfolio.

Report: The Bahamas last in region on renewable energy

The Bahamas is far from the 90 megawatts of energy produced by renewable sources to fulfill its commitment of having 30 percent renewable energy penetration by 2030, a new report from Oxford Business Group (OBG) and RBC Royal Bank reveals, adding that this country ranks the lowest in the region for renewable energy uptake.
