

Bahamas tie grid solar system

Bahamas tie grid solar system

Solar Info - Bahama Solar

Grid Tied Solar. Grid tied solar systems are the most common and cost effective way to reduce electricity costs. These installations feature zero batteries and only operate when grid power (BEC) is on. Electricity from the solar system will travel into your breaker panel, feeding all the electrical loads in the house.

Bahamas Energy & Solar Supplies , Solar & Renewable Energy

Solar is a long term investment (25 to 30 years) In The Bahamas, your return on investment can be as high as 20% or more! There are 2 types of systems. Grid Tied and Off Grid. For both, the key issue is a knowledgeable and trustworthy installer. Proper site assessment (condition and orientation of roof) is a must. Read more..

Your energy tip of the week: Battery vs. grid-tied solar systems

Your answer will determine the solution that fits you best - whether a battery system for backup power, or a grid-tied system to save money faster. And, of course, if you absolutely have to have both, and you don't mind putting out a little extra capital, you can get a bimodal hybrid system to save money and provide backup.
