## Tajikistan

Geres Tajikistan is committed to improving people's access to clean and efficient energy solutions in order to increase thermal comfort, decrease energy poverty and improve livelihoods. Geres Tajikistan works in the housing/construction sector, which is directly responsible for a significant part of energy consumption and CO2 emissions.

### Energy efficiency for improved living conditions in Tajikistan

Limited access to fuel and changes in lifestyle combined with low energy performance of buildings and poor quality of equipment contribute to high energy vulnerability for households: during the heating season families spend from 14% to 25% of their monthly budget on energy while the most vulnerable ones cannot afford heating.
