### **BURKINA FASO: 2 solar photovoltaic power plants (68 MWp)**

The capacity of Burkina Faso's electricity grid has increased by 68 MW, following the commissioning of two solar photovoltaic power plants in Pâ, in the Boucle du Mouhoun region, and Kodéni, in the Bobo-Dioulasso region (famous for its film productions).

### **Burkina Faso**

Research shows that 47% of the population of Burkina Faso would optimally be served by clean hybrid mini-grids and stand-alone solar systems. Off-grid solutions therefore have a large potential in the country.

### Burkina Faso

Burkina Faso benefits from daily sunlight of 5.5 KWh/m2 for 3000 to 3500 hours per year, with a uniformly distributed solar resource across the national territory, yielding an average of 1620 KWc. This growth in renewable energy has been facilitated by state subsidies on imported solar equipment and the adoption of new legislation regulating
