Burundi commits to double solar power capacity

Burundi has officially inaugurated the country's first utility-scale solar field, as part of push to leverage renewable energy for improved access to electricity for homes and businesses. The grid-connected 7.5MW solar power plant, located in Mubuga, became operational in 2021.

La energía solar es clave para aliviar la grave crisis energética de

Las estadísticas de la Agencia Internacional de Energías Renovables (IRENA) muestran que Burundi tenía sólo 9 MW de capacidad fotovoltaica instalada a finales de 2023. Fuente: pv-magazine Regresar

Burundi's first grid-connected solar farm reaches commercial ...

A pioneering 7.5MW solar PV plant has reached commercial operation in Burundi, increasing the country's generation capacity by over 10%. It's the country's first substantial energy generation project to go online in over three decades, supplying clean power to tens of thousands of homes and businesses.

Mubuga Solar Power Plant officially commissioned in Burundi

After six years of planning and construction, the 7.5MW Mubuga Solar Power Plant in Burundi, the first of its kind in the East African country has started commercial operations, which makes it the country's first substantial energy generation project to go online in over three decades.

Burundi's solar capacity to double

Built through a multinational effort, the pioneering 7.5 MW solar PV plant near the village of Mubuga has been in operation since May 2021 and now provides over 10% of Burundi's electricity, supplying clean power to tens of thousands ...

Burundi Solar Report ,, PVknowhow

Burundi's on-grid solar market is in its nascent stages, with around 9 MW of installed solar PV capacity as of 2023. The government is actively promoting solar energy through initiatives like the National Electrification Strategy, aiming to increase access to electricity, particularly in rural areas.

Solar key to easing Burundi's severe energy crisis

"Photovoltaics could help to cushion the country's energy complexities, if properly maintained and monitored, through standalone or pairing solar with hydropower, like in the case of Nyabikere
