### Toward Fiscal Stability and Economic Resilience: Overcoming ...

The Maldives' energy landscape is characterized by a heavy dependence on diesel fuel for electricity generation. The high cost of energy production results from this dependence, with the country importing fuel at elevated prices due to its geographical isolation and dispersion, and small-scale import quantities.

## What We Do

Carrington today offers a wide range of turn-key environmental remediation and process application systems and solutions, using various unit processes such as activated carbon, filtration, pH adjustment, disinfection, chemical addition including coagulation and precipitation, oil/water separation, soil vapor extraction, heavy metals removal

## ENERGY PROFILE Maldives

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided
