

# **Central African Republic curve energy technical services llc**

## Overview

---

Energie Centrafricaine also known as Enerca is the principal energy utility company of the Central African Republic. The company was founded in 1963 and is the primary company in the country operating in the generation, transmission and distribution of electricity. The company is owned by the government.

The total installed capacity of the company is around 28 MW of which only 18 MW is operational. Due to poor management, high operational costs, very high distribution losses and poor bill collection, ENERCA has struggled.
