Cloverleaf energy Colombia

Cloverleaf Infrastructure raises \$300 Million from NGP and ...

Cloverleaf Infrastructure is a recently established platform focused on developing clean-powered, ready-to-build sites for the largest electric loads in the U.S., including real estate acquisition, grid interconnection, onsite ...

Cloverleaf Infrastructure

The investment in Cloverleaf aims to address the significant implications of the growth in digital infrastructure and emergence of AI and cloud computing on electricity demand, grid stability, power markets and associated carbon emissions across the US.

global-footprint

We supply medical cannabis extracts and oral solutions produced in Clever Leaves' EU-GMP certified facilities in Colombia. The initial portfolio of products includes high-CBD, high-THC, and balanced CBD and THC formulations developed exclusively by Clever Leaves to meet the regulatory needs of the German market.

Cloverleaf Infrastructure

The company builds sites with a focus on grid interconnection, onsite storage and generation, and low-carbon energy, thereby enabling sustainable, carefully planned projects to unlock jobs, local tax revenue, and economic growth.

Cloverleaf raises USD 300m to develop clean-powered data centres

Private equity firms NGP and Sandbrook Capital have jointly injected more than USD 300 million (EUR 274.3m) into Cloverleaf Infrastructure, a US company developing clean-powered data centre sites.
