Colombia will announce next week a US\$40 billion investment to finance its planned transition from fossil fuels to clean energy. Energy transition is one of the key priorities of Colombia's current government, which took office two years ago.

Home

Performance Energy Services delivers precision installation and unrivaled project oversight in both land and offshore construction. No matter the scale, and no matter the setting, our experienced project managers oversee the planning, scheduling and ...

Colombia

The country's energy matrix is clean but highly dependent on climatic conditions to generate hydro power. Colombia's Mining and Energy Planning Unit (UPME) has conducted three renewable energy auctions and has awarded a total of nine wind and 16 solar large-scale projects, worth around USD 3.1 billion.

Colombia's energy sector grows as oil and gas resources expand

In 2018 energy demand in Colombia rose by 3.3% and total distribution reached 69.1 GWh. The agriculture, livestock and fisheries sector is the primary driver of demand, followed by transport and storage. In the first quarter of 2019 demand rose by 4.5%, tracking an increase in broader economic activity.

GRADE A BATTERY

LiFePO4 battery will not burn when overcharged, over discharged, overcurrent or short circuited and can withstand high temperatures without decomposition.

REDEFINING THE ENERGY SECTOR

locate & negotiate the best price for equipment across the Energy sector. With access to manufacturing businesses, equipment suppliers & service providers, Performance Energy can piece together custom packages and support the mobilisation of equipment globally. Rigs/Units can be provided fully crewed or unmanned. Global Reach Rigs/Unit Sourcing
