

Croatia kraft solar

Croatia kraft solar

Croatia

The Croatian government, while favouring solar technology supported by low costs and the country's high irradiation, also expects wind power to grow quickly. Opening its first Croatian office in Zagreb in 2021, Statkraft is developing its ...

Croatia Solar Photovoltaic (PV) Power Market Development in the

...

The available renewable energy quota was 88MW, with 50MW envisaged for solar. As a result of the tender, Croatia allocated only 25.5MW of renewable power capacity, including 13.4MW of solar capacity. This year, the Croatian energy market operator HROTE will conduct its second auction for 400MW solar and wind power capacity.

Statkraft seeks EIA for 97 MWp PV project in Croatia

Croatian electricity producer Statkraft OIE, a subsidiary of Norwegian utility Statkraft, has submitted a request for an environmental impact assessment (EIA) of a project for the construction of a 97 MWp solar photovoltaic (PV) power plant, the ministry of environmental protection and green transition said on Wednesday.

Croatia Deployed 238.7 MW of Solar in 2023

Croatia added 238.7 MW of installed solar in 2023, according to figures from the Renewable Energy Sources of Croatia (RESC). The association said the country's total installed solar capacity now stands at 462.5 MW.

Croatia: Statkraft expands renewable energy footprint with 750 MW solar ...

Norwegian Statkraft, Europe's largest renewable energy producer, has announced significant growth in its operations in Croatia, underscored by a robust pipeline of development projects. The company currently has over 750 MW of solar power capacity in development, demonstrating its strong commitment to the Croatian market.

Statkraft developing 750 MW solar capacities in Croatia

September 18 (SeeNews) - Norwegian state-owned utility Statkraft, Europe's largest renewable energy producer, said it has more than 750 MW in solar power capacity under development across Croatia. Statkraft opened its new office in Zagreb on September 17, 2024.

Croatia: Statkraft to sell renewable energy projects

Earlier this week, Statkraft confirmed its decision to sell its onshore wind, solar, and battery operations in Croatia and the Netherlands, as well as hydropower and solar production assets in India. The company is now prioritizing markets with strong potential in the Nordic region,

Europe, and South America.

Croatia's solar energy gets a citizen-led boost - DW - 09/21/2023

Why is there so little solar energy in one of Europe's sunniest countries? Meet the Croatians battling old socialist stereotypes and government red tape to change that.

Croatia to add 1,200 MW of solar, wind in 2024

Croatia is set to put online a total of 1,200 MW in solar and wind power capacity in 2024, State Secretary in the Ministry of Economy and Sustainable Development Ivo Milatic said on the sidelines of the II Regional Conference RE-Source Croatia Hub 2024, dedicated to the development of power purchase agreements (PPAs).

Country series: Sun rising for Croatia

Croatia is aiming for a solar power capacity of 0.77 GW by 2030 and a doubling of its wind power production to 1.99 GW. In parallel, the country's coal-fired power plants are to be decommissioned by 2033.

Croatia

The Croatian government, while favouring solar technology supported by low costs and the country's high irradiation, also expects wind power to grow quickly. Opening its first Croatian office in Zagreb in 2021, Statkraft is developing its own wind and solar projects in the region and is also actively looking to acquire mid-size projects going
