M+L Manufacturing

M+L work in close partnership with leading global suppliers including Cubic Modular Systems and Schneider Electric. As an independent switchgear manufacturer we can also engage with any supplier of electrical components in order to source the ideal solution for you.

CUBIC systems for low voltage switchgear and motor control

The CUBIC withdrawable system for low voltage switchgear and motor control is developed to offer maximum personal safety, versatility, and operational dependability. The system offers unrivalled versatility in layout and stacking density, and can be configured to accommodate all type of control systems such as profibus etc.

CUBIC

THE MODULAR SYSTEM The modular system can be used in many situations, where electrical switchboards are a necessity to ensure the operation of electrical equipment. CUBIC can offer solutions based on our modular system for the following types of switchboards: o Main and distribution switchboards o MCC panels o Control panels o 19" rack

Modular System for Low-Voltage Switchboards

The basis of the CUBIC Modular System has a main module size of 192mm. This unique dimension ensures a maximum of versatility and enables an enclosure, which can be customised to meet individual requirements and demands from the user.

CUBIC

Our modular mindset is the core of our business model and unique product concept, and makes us the best at what we do, by offering state of the art modular enclosure solutions based on flexibility, functionality, cost efficiency, training and support.

Products

CUBIC's product programme consists of the five following areas: Modular System switchboards, standard and customized enclosures, CPS25, Cu-flex busbar connections and electric components & switchgear.
