### TOWARDS AN ENERGY SECURE KIRIBATI

The energy supply sector has good potential to reduce GHG emissions in electricity generation using proven low generation carbon technologies. The energy demand sector has been progressing to complement the social economic development goals. The transport sector has good mitigation potential but it is

### Kiribati , NEXSTEP

As an island nation, which is currently heavily reliant on imported energy resources, energy security is high on Kiribati's development agenda. Therefore, key aims of the country should include diversification of the power generation mix, with a focus on indigenous sources (i.e., solar and wind) and a reduction in the reliance on imported

## ENERGY PROFILE Kiribati

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

## Kiribati Integrated Energy Roadmap: 2017-2025

The resulting Kiribati Integrated Energy Roadmap (KIER) highlights key challenges and presents solutions to make Kiribati's entire energy sector cleaner and more cost effective. As a small, remote island state, Kiribati is highly dependent on imported energy supply. Electricity is one of the government's largest expenditures.

## Kiribati Integrated Energy Roadmap (KIER): 2017-2025

The KIER is Kiribati's comprehensive energy roadmap, which takes into account renewable energy and energy efficiency potential in all sectors from 2017 to 2025.
