EIG C020 Battery Pack

I am currently looking to purchase a battery, BMS and charger for my conversion project and am considering using EIG C020 cells. I would be interested in people's opinions, advice and experience from their own builds, particularly with these cells. I require 120V nominal voltage, 500A peak current, and a minimum of 16kWh of energy.

EIG EPLB C020B Lithium Ion x 25 Cell, 20Ah 100A (200A Peak) 1/2 ...

EIG EPLB C020B Lithium Ion Cells 20Ah 100A (200A Peak) 13 ...

I am selling 13 used EIG 20ah cells and a 14s
BMS(30A charge/discharge) Average 16 mohm
The cells have been unused for over an year and
have been used for an ebike setup before 4 cells
of the 13 were separately used for lighting setup.
