### Energy

The energy sector in El Salvador has grown significantly in recent years, positioning the country as a regional leader in the transition to cleaner and more sustainable renewable energy sources, and sustainable energy sources.

### El Salvador: Energy System Overview

GOAL: to promote an understanding, on a global scale, of the dynamics of change in energy systems, quantify emissions and their impacts, and accelerate the transition to carbon-neutral, environmentally benign energy systems while providing affordable energy to all.

### Energy profile: El Salvador

Since adopting the Paris agreement, El Salvador has prioritized clean energy sources and system-wide improvements in energy efficiency. Bioenergy, geothermal, hydropower, solar, wind, and ocean energy are the key renewable sectors

receiving funding. [1]

## President Bukele: Leading El Salvador Toward Energy Sovereignty.

President Nayib Bukele has declared El Salvador a leader in renewable energy, boasting an impressive 91% of its energy generation derived from renewable sources, according to Stats Feed. "This percentage will increase as we build our new geothermal plants.

## El Salvador positions itself as a benchmark for renewable energy ...

"In terms of energy, El Salvador is positioning itself very well because there is an important balance between hydroelectric and geothermal power, and thermal power plants that make it possible for us not to have any problems. The energy sector is being managed very well", said the Salvadoran businessman.

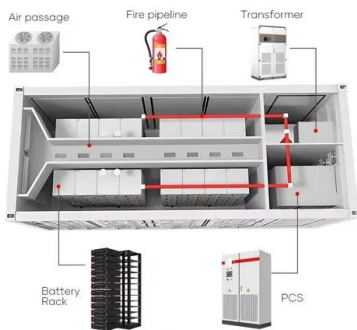

## El Salvador: Energy Country Profile
