### Applications

## Boiler Replacement

You will not need to apply to Guernsey Electricity for additional load as the system is already in place and there are many local installers able to replace an electric boiler for you. Find someone to replace your electric boiler >

### Underfloor heating , Guernsey Electricity

Off-Peak Storage Heating. This heating system runs on the cheapest tariff available for electric heating as, like a battery, they're designed to store heat energy during your low-rate overnight periods. This ensures only the chosen installer makes a single application to Guernsey Electricity for the additional electricity load required

### Storage Heaters , Guernsey Electricity

Storage heating uses clever systems that maximise off-peak (low-rate) electricity to heat up specialised storage bricks within the heaters. These clay or ceramic bricks act like a reservoir, absorbing your cheaper overnight electricity, then storing it ...

## Products

Electric storage heaters have had a bad reputation, but things have changed. With intelligent controls and modern insulation techniques, today's electric storage heaters allow you to enjoy comfortable heating. They're ideal for Guernsey as our temperatures rarely dip below freezing so will run extremely efficiently.

## Products

With intelligent controls and modern insulation techniques, today's electric storage heaters allow you to enjoy comfortable heating. At the same time they can help reduce your energy bills by taking advantage of cheaper, off-peak electricity.

### Tariffs , Guernsey Electricity

Guernsey Electricity Limited, in accordance with section 23(2)(b) of the Electricity (Guernsey) Law 2001, hereby gives notices that the maximum resale price at which electricity can be resold by persons to whom it is supplied is \*25 pence per unit. Storage heaters work by storing heat generated using low-rate electricity overnight and

### IMPORTANT: What you need to know first , Guernsey Electricity

A heating system only ever needs to replace the amount of heat lost from your property. The more heat it loses, the more electricity is needed to power the electric heating system. This electricity also needs to be paid for - so insulating a property is also a brilliant long-term investment that could save you thousands of pounds in running costs.
