Electrochem battery Georgia

Korea's Enchem planning two sites in Georgia

South Korean battery materials manufacturer Enchem Ltd. has confirmed plans to make an investment of more than USD 60 million in Jackson County, Georgia, the Governor's office said. The project will include two new manufacturing plants and create more than 300 jobs.

Korean battery supplier to locate in Jackson County

Enchem will build two facilities in Jackson County, where it will make electrolytes used in rechargeable batteries, Gov. Brian Kemp's office announced on Wednesday.

US state strengthens Korean links as it welcomes lithium materials

Korean firm Enchem is set to build two plants in Jackson County, Georgia, US, to manufacture lithium battery electrolyte and electrostatic double-layer capacitors (ELDC). The state's governor Brian Kemp announced the \$61.35 million project, which builds on the success of the south-eastern state in attracting Korean battery giant SK Innovations .

ELECTROCHEM An Integer Company

With a diverse portfolio of ruggedized cells in various sizes, temperature ranges and rate capabilities, our team can design a custom battery pack to meet the unique needs of your critical application. We design solutions for long term, zero-defect performance using stringent quality processes; resulting in the most reliable products on the market.

Georgia Lands First Korean Supplier to Car Battery Plant

Georgia has landed the first Korean supplier to the electric vehicle battery plant that will serve as the single largest foreign investment in the state's history. EnChem, which makes electrolytes that go into rechargeable lithium batteries and other energy storage devices, will put two separate facilities next to the nearly \$1.7 billion SK
