Grenada Seeks EOIs for Grid-Scale Solar and Storage Project

The Public Utilities Regulatory Commission (PURC) of Grenada is inviting expressions of interest (EOIs) for a renewable energy project at the island nation's main international airport. The project aims to increase Grenada's reliance on renewable energy and reduce its dependence on fossil fuels.

Grenada's Power System Integrated Assessment with United ...

The RFF project in Grenada aims to support the country's low-carbon energy transition and COVID-19 green recovery effort. The project conducted in 2022 has delivered its products, including an electricity demand profile, an assessment of renewable energy potentials, review of generation plans and costs.

 LFP 12V 100Ah

Energy Snapshot

This profile provides a snapshot of the energy landscape of Grenada--a small island nation consisting of the island of Grenada and six smaller islands in the southeastern Caribbean Sea--three of which are inhabited: Grenada, Carriacou, and Petite Martinique.

2021 Energy Report Card - Grenada

The 2021 Energy Report Card for Grenada provides an overview of energy sector

performance and includes energy efficiency, projects, technical assistance, workforce, training and capacity building information, subject to ...

The future is bright for renewable energy in Grenada

As part of the Grenlec Community Partnership Initiative (GCPI), three major projects are being finalized for the installation of rooftop solar PV systems to subsidise the homes' energy expenditures and grow Grenada's renewable energy penetration.

Grenada's Energy Market: A Strategic Investment for ...

Grenada, a small island nation in the Caribbean, has been making significant strides in recent years to develop its energy market. With a population of just over 100,000, Grenada may not seem like an obvious ...

Grenada's Energy Market: A Strategic Investment for Global

Grenada, a small island nation in the Caribbean, has been making significant strides in recent years to develop its energy market. With a population of just over 100,000, Grenada may not seem like an obvious choice for global energy companies looking to ...

2021 Energy Report Card - Grenada

The 2021 Energy Report Card for Grenada provides an overview of energy sector performance and includes energy efficiency, projects, technical assistance, workforce, training and capacity building information, subject to the availability of data.

Energy profile: Grenada

As of 2020, Grenada had an installed electrical generating capacity of 53 MW, supplied almost entirely by fossil fuels. Production. In 2020, Grenada produced 223 GWh of electricity, relying mainly on fossil fuels (98.12%), with a small contribution from solar energy (1.88%). Demand. In 2018, peak demand was 33.2 MW. Consumption

Grenada: Energy Country Profile

Grenada: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Grenada's Renewable Energy Options - GRENLEC

Grenada's energy portfolio needs to secure safe, reliable, high-quality electricity at the lowest possible cost for all citizens. Our approach is to encourage energy efficiency and use proven renewable energy technologies prudently to help our nation prosper economically in an environmentally sound and sustainable way.
