Where we do it - Sunia Energy Solutions

We have been pioneers to launch solar power projects in West Africa, as, for example, the Solar Plant in Bambadinca, Guinea Bissau or the first hospital 100% powered with solar energy in Bafatá, Guinea Bissau or the installation of street lighting in the Bissagos islands. We are now running our first 1,4MWp roof panels project in Mexico.

Partnerships

Over the years, GENESIS ENERGY GROUP has forged multiple and solid partnerships to develop and deploy various power and gas projects across several countries on the African continent: Guinea Bissau, Nigeria, Republic of Benin, Sao Tomé and Príncipe, Mali, Democratic Republic of Congo, Rwanda, South Africa, Zambia and Zimbabwe.

LFP12V100

- Voltage range: 691.2-947.2V
- >6000 cycles (100% DOD)
- Rated battery capacity: 216KWh (customizable)
- EMS communications: 4G/CAN/RS485

Climate Change Initiatives in Guinea-Bissau: Addressing ...

The government has outlined plans to increase the share of renewable energy in the national energy mix, including solar and wind power projects. By harnessing these sustainable energy sources, Guinea-Bissau aims to significantly decrease its reliance on fossil fuels, thereby mitigating greenhouse gas emissions effectively.

Environment & Climate Change Resilience

UNDP supports the Government of Guinea-Bissau in enhancing local communities' resilience and adaptability to the impacts of climate change, while advancing the interconnected Sustainable Development Goals (SDGs).

In Pursuit of a Green Energy Economy: Guinea-Bissau Explores ...

The west-African nation of Guinea-Bissau represents a particularly attractive market for energy explorers, owing to the largely unexplored on- and offshore basins. With no domestic hydrocarbon capacity and minimal renewable energy generation, the country is aggressively pursuing investment in the energy sector to address energy poverty across

Guinea-Bissau launches large-scale solar power with IDA support

The World Bank has announced that it will support the development of Guinea-Bissau's first solar power plants. Like other West African countries, Bissau wants to use this solution to decarbonise its electricity production and accelerate the electrification of its population.
