Energy Vault to build 100-MW hybrid gravity storage site in Italy

Energy Vault, Carbosulcis announce hybrid gravity energy storage project at Italy's largest former coal mining site in Sardinia. Photo: Business Wire. The system is specially designed by Energy Vault for underground mines, combining the company's new EVO modular pumped hydro gravity storage technology and lithium-ion batteries.

Energy Vault

Located at Carboluscis' Nuraxi Figus coal mine in Sardinia, Italy, Energy Vault, starting from a first industrial prototype, is developing an innovative hybrid gravity + battery energy storage system to help stabilize Sardinia's power grid. The Miniera d'Energia project will play a crucial role in aiding the Sardinian Government's ambition to

Italy: Energy Vault and Carbosulcis Announce 100MW Hybrid

The hybrid energy storage system utilizes Energy Vault's new EV0(TM) modular pumped hydro gravity storage technology plus lithium-ion batteries, and powered by VaultOS(TM) energy management software, is proposed to be deployed in 500-meter-deep shafts at the largest former coal mine in Italy, owned by the Sardinia Regional Government.

Products internal page - EVx

EVx(TM) is the natural evolution that leverages all current performance attributes of Energy Vault's proven technology including zero degradation in storage medium, high round-trip efficiency, long technical life, a sustainable supply chain, and composite bricks.

La Rivoluzione dei Sistemi di Accumulo Gravitazionale di Energia

Energy Vault ® sviluppa e distribuisce soluzioni di accumulo di energia su scala industriale progettate per trasformare l'approccio mondiale all'accumulo di energia sostenibile. L'offerta completa dell'azienda comprende tecnologie proprietarie di accumulo gravitazionale, con batterie e a idrogeno verde.

Energy Vault EVx(TM) Gravity Energy Storage Technology Named a ...

Energy Vault's EVx GESS technology, currently being commissioned in Rudong, China, will be the world's first grid-scale gravity energy storage system when fully operational. To date, nine EVx deployments are underway across China via a licensing agreement with China Tianying (CNTY)

and Atlas Renewable, totaling more than 3.7 GWh.
