EnerSol History and Projects

EnerSol's History. EnerSol is a privately-held turnkey supplier of waste-to-energy ("WTE") systems designed to profitably convert various types of organic and inorganic waste (e.g. household, medical, industrial, biomass, municipal, petroleum coke) into energy in the form of cleaner fuels and electricity.

Energy in Iceland

Iceland is the first country in the world to create an economy generated through industries fueled by renewable energy, and there is still a large amount of untapped hydroelectric energy in Iceland. In 2002 it was estimated that Iceland only generated 17% of the total harnessable hydroelectric energy in the country.

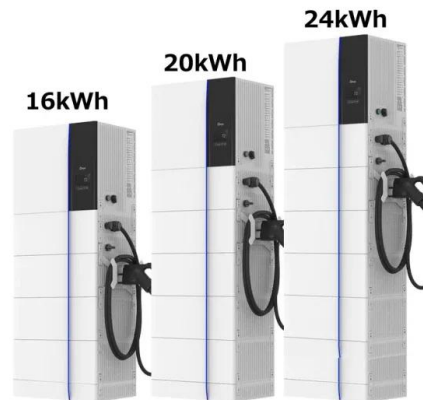

EnerSol

Welcome to EnerSol's web site, a celebration of EnerSol's unique contribution to the global transition to sustainable energy! Through this site, EnerSol wishes to share its experience and its message of hope with others around the world.

Another photovoltaic company prepares to shut down its plant

German rooftop solar photovoltaic and energy storage system installer Enersol, owned by battery product manufacturer Sonnen, will cease operations in October 2024, local newspaper Bietigheimer Zeitung (BZ) reported. The company said Enersol is not insolvent and its parent company Sonnen will continue to provide warranty support to Enersol customers.
