Are they right for you?

Water is the most important commodity that we largely take for granted. It is essential not only for life but. To help reduce this risk, many investors are plowing money into safer stocks of more well-established companies that stand to benefit by serving the data centers that house the computers that crunch the numbers for AI computations. The safer bets are utilities, both those that provide electricity. Given the central role it plays in many industries, the case for investing in water is strengthened by its increasing demand and unstable supply. In acknowledgment of World Water Day on March 22, we take stock of water investment solutions available to US investors. There are just 11 water-focused. These are the water stocks to buy as they represent companies with potential for sustained growth and cash flow upside on the back of positive industry tailwinds.
