Federal agencies reduce carbon emissions with energy savings

By requiring projects to be part of privately financed performance contracts like ESPCs or UESCs, the AFFECT grants improve the ability of agencies to incorporate energy conservation measures into projects that would not otherwise be supported by project economics.

Resources for Implementing Federal Energy Savings Performance Contracts

The Federal Energy Management Program (FEMP) offers resources to help federal agencies implement energy savings performance contracts (ESPCs). ESPC resources are listed by essential education, phases of the ESPC process, and general information. ESPC case studies and training are also available.

ESPC Best Practices

Agencies should use this document and all of FEMP's ESPC resources to help them award high-quality and high-value ESPC task orders (TOs). FEMP ESPC guidance, contract document templates and examples, and other informational resources are available at . .

Energy Savings Performance Contracts for Federal Agencies

Energy savings performance contracts (ESPCs) allow federal agencies to procure energy savings and facility improvements with no up-front capital costs or special appropriations from Congress. An ESPC is a partnership between an agency and an energy service company (ESCO).
