NATO member embraces solar energy for independence

Estonia stands at the forefront of Europe's transition toward sustainable energy independence through ambitious investments in solar power coupled with community-driven initiatives aimed at fostering economic resilience amidst challenging geopolitical landscapes shaping global affairs currently trending now more than ever before!

Solar energy

Solar energy is the only renewable, free of charge and inexhaustible form of energy. Every day more sunshine reaches the earth that we take advantage of. This is exactly the reason why choosing solar energy will be the best possible choice. Common myths that say there is not enough sunshine in Estonia are not true.

Manufacturing

By 2029, the European Union will mandate solar energy-producing roofs for all new constructions, marking a significant shift in building regulations and energy policies. With the world's growing energy needs, the focus is shifting towards implementing efficient and intelligent energy solutions.

Homepage

Solar is one of the most sustainable and accessible energy sources. Since 2020 we have completed development and construction of more than 62MW of solar capacity. We have more than 744MW of ongoing projects around Estonia in ...
