## Overview

---

EVF Deep Cycle AGM Battery is specially designed for frequent deep cycle discharge. By using the specially designed active material and strong grids, the EV series sealed lead acid battery offers reliable performance in high load situations and can deliver more than 300. The HRESYS EVF Series VRLA Battery represents the pinnacle of innovation in the field of container energy storage systems. Engineered with precision, this advanced battery solution caters to a variety of electric vehicles and tools, including electric tricycles, electric automobiles, and. The container system is equipped with 2 HVACs the middle area is the cold zone, the two side area near the door are hot zone. PCS cabin is equipped with ventilation fan for cooling. 40 foot Container can Installed 2MW/4.58MWh We will configure total 8 battery rack and 4 transformer 500kW per. We combine high energy density batteries, power conversion and control systems in an upgraded shipping container package. Lithium batteries are CATL brand, whose LFP chemistry packs 1 MWh of energy into a battery volume of 2.88 m<sup>3</sup> weighing 5,960 kg. Our design incorporates safety protection. The MW-class container energy storage system includes key equipment such as energy conversion system and control system. The core technologies are concentrated on battery pack, battery cluster structure design, battery system thermal design, protection technology and battery management system. The Bluesun 20-foot BESS Container is a powerful energy storage solution featuring battery status monitoring, event logging, dynamic balancing, and advanced protection systems. It also includes automatic fire detection and alarm systems, ensuring safe and efficient energy management. The 20FT. Up to 1MWH 40ft Container 350KWH per 20ft Container The energy storage system consists of a battery pack, battery management system (BMS), load balancing system, power conversion system (PCS), chargers and other components.
