HI U

the Falkland Islands is 220-240 Volts (this is the average voltage as of course it continuously fluctuates) and 50 Hertz. In the USA and many South American countries, the US standard of 110 Volts and 60 Hertz is common. Alternating

current has the advantage that the voltage can be easily and inexpensively changed by using a transformer.

Cassard House

Roof-mounted solar panels provide hot water and under-floor heating and a cosy atmosphere is guaranteed through high levels of insulation and triple-glazed windows. The large sun lounge and wind powered electricity, boosted by photo voltaic solar panels, ensures that the natural elements are fully utilised.
