

France how to install solar pv

Overview

At the outset it is important to define the term 'solar panel' as there are two types of panels, which are frequently confused with one another. These two types are: 1. Thermal solar panels (solaire thermique) and 2. Photovoltaic solar panels (panneaux photovoltaïques). The former is merely for the provision of your.

Since 1st January 2014 there are no longer any tax credits available for the installation of photovoltaic solar panels. Nevertheless, in France, as in many other countries, there are incentives in place for property owners to sell.

The costs of installing photovoltaic solar panels will vary by region and type of property. However, as a rule of thumb, the French energy management agency 'ADEME' considers the.

The good news is that income generated from photovoltaic installation no greater than 3k/W is exempt from income tax and social charges, provided the income is not part of a professional activity. For installations with a power.

Just how much income you can earn each year will depend on the size, orientation and location of the installation. Clearly, the further south is the property, then the greater the income you will earn. Be careful of the projections.
