Project

CEOG is an innovative multi-megawatt power plant designed to produce reliable and clean electricity. CEOG will provide cheaper and firm power all year long, day and night, to 10 000 homes in Western Guiana. Combining a photovoltaic plant and mass storage of energy in the form of hydrogen, CEOG is the alternative to a classic diesel power plant.

use solar, biomass and hydro to reach 85% renewables

ENERGY PROFILE French Guiana

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).

Solar Farms in French Guiana , RESDM

Find solar panel locations in French Guiana through our French Guiana solar farm map. Analyze the main characteristics of solar farms in this country, sort these by capacity, panels area and landscape area.

Application scenarios of energy storage battery products

ENERGY PROFILE French Guiana

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).

Power plant profile: French Western Guiana Solar PV Park, French Guiana

French Western Guiana Solar PV Park is a ground-mounted solar project. The project is expected to generate 50GWh electricity and supply enough clean energy to power 10,000 households. The project is expected to offset 39,000t of carbon dioxide emissions (CO2) a year.

Solar focus in French Guiana energy programme, ...

French energy minister Ségolène Royal has signed a decree establishing an energy programme (PPE) for French Guiana, that aims to use solar, biomass and hydro to reach 85% renewables

French Guiana

As well as contributing to network stability, particularly during peak consumption periods, the rollout of solar power is accelerating French Guiana's energy transition. This strategic objective is supported by Albioma and consistent with France's multiyear energy plan (PPE), which aims to increase the share of renewable energy in French

- 50KW/100KWH
- HIGHER POWER OUTPUT IN OFF-GRID MODE
- CONVENIENT OPERATION & MAINTENANCE
- PRE-WIRED
