COMPLETION OF A SOLAR PROJECT IN THE COOK ISLANDS

"New Zealand company Infratec has completed a \$US10.8 million Asian Development Bank project to deliver reliable renewable energy to four islands in the southern Cook Islands. "Over the past two years Infratec has designed and delivered solar mini grids and new underground network distribution systems on Atiu, Mangaia, Mauke and Mitiaro.

Renewable energy in the Cook Islands

Renewable energy in the Cook Islands is primarily provided by solar energy and biomass. Since 2011 the Cook Islands has embarked on a programme of renewable energy development to improve its energy security and reduce greenhouse gas emissions, with an initial goal of reaching 50% renewable electricity by 2015, and 100% by 2020. The programme has been assisted by ...

Cook Islands: 100% Renewable Energy in Different Guises

To support this ambitious plan the Asian Development Bank and the European Union fund the Cook Islands Renewable Energy Sector

Project, which will construct up to six solar photovoltaic (PV) power plants with a total installed capacity of about 3 megawatts-peak coupled with battery to store electricity from solar energy.

Cook Islands Renewable Energy

The Cook Islands Government aims to achieve 90% of their power needs from renewable energy by 2020. We helped the government realise its aim. To support the Cook Islands Government, the New Zealand Government - through the Ministry of Foreign Affairs and Trade, installed mini-grid photo-voltaic power systems in a number of villages on six

Cook Islands - 100% Renewable Energy Atlas

Although nearly all households in the Cook Islands are connected to grid electricity, only 5.5% of households have additional solar photovoltaic systems installed, and 1% use small diesel generators. Several actions have taken place throughout the islands to increase the uptake of renewable energy.
