Safety cabinets

DIN EN 14470-1 and DIN EN 14470-2 establish requirements in respect of the construction of the cabinet and its capacity to withstand external exposure to fire. A categorisation of the cabinets is undertaken according to the degree of fire resistance and a prototype test established based on previously existing fire resistance tests.

Safety Cabinets

The single and two-leaf safety cabinets of the PRIOCAB safety cabinets of PRIORIT, for example, can be reached under by simple pallet trucks and fork-lift trucks and moved through two metre high room doors. The Type 90 safety cabinets have smooth and easy free-running doors, which remain open in each position and close automatically in case of
