

# Greco power and energy Ecuador

## Overview

---

The 2023-2024 Ecuador electricity crisis was caused by a severe drought that depleted water levels at hydroelectric plants and a lack of capacity buildup. Ecuador experienced rolling blackouts for up to 14 hours per day in the fall crisis (started on 23 September 2024 ) of 2024. Researches describe fall 2023 (27.

No new electric capacity had been added to the since station started operation in 2016, while the demand by 2024 had increased by 24%, or about 400 (MW). The were.
