Guinea-Bissau drax energy

World-leading engineering team appointed to Drax's Cruachan ...

Renewable energy leader Drax has appointed globally renowned hydro engineering consultants COWI and PINI in a new joint venture to optimise its plans to build the UK's first new pumped storage hydro plant in almost 40 years.

Drax and Pathway Energy agree heads of terms on sustainable ...

UK-based renewable energy leader Drax Group (Drax), and Pathway Energy LLC (Pathway), a carbon negative energy company, have reached heads of terms on a multi-year deal that could see Drax supply over 1 million tonnes of sustainable biomass pellets each year to Pathway's proposed sustainable aviation fuel (SAF) plant on the US Gulf Coast.

ENERGY PROFILE Guinea-Bissau

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

Energy a key component of Country Strategy for Guinea-Bissau

The expected results in the energy sector are:

installing 500 solar street lamps, reducing energy loss, finalising the 225-kV western backbone interconnection line in the Gambia basin and developing renewable energy. This will enable Guinea-Bissau to increase the contribution of renewable energy to its total supply mix from 0 to 36%.

SSEN Transmission and NGET begin work on EGL2 subsea link

The £4.3bn project features a high voltage direct current (HVDC) subsea transmission cable stretching from Peterhead in Scotland to Drax in Yorkshire.

Energy a key component of Country Strategy for ...

Drax pushes CO2 removal via BECCS as key climate tool

Why Drax is pushing CO2 removal as a key climate tool. Drax is out to prove that applying carbon capture and storage technologies to biomass-fired energy production is vital to get to net zero. Energy Monitor spoke to the UK power company's CEO Will Gardiner.

Drax Group CEO, Will Gardiner, welcomes National Energy ...

Drax is progressing plans to develop the UK's first new pumped storage hydro power station in a generation. The proposed 600 MW new plant would be built adjacent to the existing Cruachan facility. The project has received development consent from the Scottish Government and the UK Government is working on plans to introduce a new investment

Drax signs major partnership for Hollow Mountain PHES project

Drax has appointed global technology and engineering firm Voith Hydro to move its plans forward for its proposed 600MW underground pumped hydro energy storage (PHES) project in Scotland. The 600MW Hollow Mountain power station will be built inside Argyll's highest mountain Ben Cruachan, alongside the company's 440MW PHES station Cruachan.

Guinea Bissau

Guinea-Bissau has huge potential for clean energy development, but these energy resources are undeveloped due to inadequate financial, regulatory and technical capacities. Source: Guinée Bissau - Update and Extension of the Country Strategy Paper 2015-2019 to December 2021
