Guinea-Bissau Secures \$78.15 Million for Solar Project

The World Bank, IDA, ESMAP, and GCF are funding Guinea-Bissau's first solar power plants with a \$78.15 million investment to support decarbonization and expand electricity access. The project will build solar ...

ENERGY PROFILE Guinea-Bissau

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).

World Bank Funds Solar Farm in Guinea Bissau

The World Bank is supporting the development of Guinea-Bissau's first solar power plants, aiming to decarbonise electricity production and boost electrification. Under the Solar Energy and Access to Electricity Development Project, the World Bank will assist Guinea-Bissau until 2030 and has already approved a USD \$30 million grant.

World Bank Supports Guinea-Bissau's Solar Power Expansion

World Bank funds Guinea-Bissau's first solar

power plants for decarbonisation and expanded electricity access. The World Bank, IDA, ESMAP, and GCF committed \$78.15 ...

Guinea Bissau: World Bank Invests in Solar

Washington -- The World Bank's Board of Executive Directors approved a \$35 million grant to enable solar power generation and increase access to electricity in Guinea ...

Project Information Document (PID)

Only 29 percent of Guinea-Bissau's population has access to electricity, with around 58 percent in the capital city Bissau. Electricity is both scarce and very costly, making it among the most expensive in the African continent at

- Efficient Higher Revenue**
 - Max. Efficiency 97.5%
 - Max. PV Input Voltage 600V
 - 500W Peak Output Power
 - 2 MPPT Trackers, 100% DC Input Utilization
 - Max. PV Input Current 15A, Compatible with High Power Modules
- Intelligent Simple O&M**
 - IP66 Protection Degree: support outdoor installation
 - Smart 1-19 Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
 - DC & AC Surge & SPD: prevent lightning damage
 - Battery Reverse Connection Protection
- Flexible Abundant Configuration**
 - Plug & Play, EPT Switching Under 20ms
 - Compatible with Lead acid and Lithium Batteries
 - Max. 6 Units Inverter Parallel
 - ARC Function (Optional): when an arc fault is detected the inverter immediately stops operation

World Bank Approves \$35M to Support Solar Power in Guinea-Bissau

International finance institution the World Bank will support the development of Guinea-Bissau's first solar power plants with a \$35 million grant through its Solar Energy Scale-up and Access project.

World Bank Funds Solar Farm in Guinea Bissau

The World Bank is supporting the development of Guinea-Bissau's first solar power plants, aiming to decarbonise electricity production and boost electrification. Under the ...

Guinea-Bissau Secures \$78.15 Million for Solar Project

The World Bank, IDA, ESMAP, and GCF are funding Guinea-Bissau's first solar power plants with a \$78.15 million investment to support decarbonization and expand electricity access. The project will build solar plants near Bissau and install mini-grids on the Bijagós islands, thereby providing electricity to 1,200 households and SMEs.

Project Information Document (PID)
