

# **Haiti solar container subsidy announcement**

## Overview

---

Port-au-Prince, Haiti, March 18, 2025 – In a significant move to strengthen Haiti’s recovery efforts and energy security, IFC – a member of the World Bank Group – and IDB Invest – the private sector arm of the Inter-American Development Bank (IDB) – announced a US\$13.5 million investment in Haiti’s growing solar industry. This strategic funding is designed to significantly expand access to clean, renewable energy across the country, helping address Haiti’s decades of infrastructure challenges and fuel dependency. With decades of infrastructure challenges and fuel dependency, Haiti is embracing a groundbreaking shift: a \$13.5 million investment in residential solar power Haiti. This initiative isn’t just about energy — it’s about transforming lives, communities, and the nation’s economic future. Backed by Haiti energy storage subsidy policy documents that directly impact the cost of electricity, Haiti also faces challenges in terms of lack of grid access, reliability of electricity service, and the prevalence of wood and charcoal fuels for home energy consumption. The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now account for approximately 35% of all new utility-scale storage deployments worldwide. North America leads with 40% market.
