Electricity sector in Honduras

Honduras has a very large potential to develop energy efficiency programs. Large improvements could be made in the areas of air conditioning for both the residential and commercial sectors, where the implementation of measures in the area of demand management and the rational use of energy could prevent unplanned blackouts.

Honduras: Energy Country Profile

Honduras: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

A Brief History of Enpal - CBM

Delve into the captivating history of Enpal, a company that has revolutionized the world of renewable energy. From its humble beginnings to becoming a leading provider of solar power solutions, Enpal's journey is as inspiring as it is innovative.

Enpal, MongoDB, and renewable energy's "hot" data challenge

Enpal has made huge strides since that round (led by TPG Rise Climate among other investors), with over 80,000 solar panel arrays, 4,000+ heat pumps and thousands of electric vehicle (EV) chargers now live across Germany - and the startup is also eyeing broader European expansion.

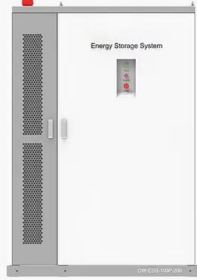

Honduras Energy Situation

The total primary energy offer in Honduras is around 4.62 Mtoe or 53,730.6 GWh. The main source of primary energy is petroleum (53%) followed by combustible renewable and waste (44%), and coal (3%). The residential energy consumption [1] is around 47% of the national consumption, of which 86% are provided by biomass, primarily firewood.

PRODUCT INFORMATION

- BATTERY CAPACITY**
50kWh~500kWh
- DC VOLTAGE RANGE**
400V~1000V
- DEGREE OF PROTECTION**
IP54
- OPERATING TEMPERATURE RANGE**
-10~50°C
