

# **How tall is the solar container building**

## Overview

---

Constructed from repurposed shipping containers stacked nine stories high, the building stakes its claim as the tallest shipping container-based structure in the world. He had already stacked containers two and three stories, but with his Ida apartment complex, Brian Stark went 85 feet high with 64 containers (on top of two floors of concrete culverts) to create North America's tallest container building. The 64-shipping-container tower packs features to avoid. He had already stacked containers two and three stories, but with his Ida apartment complex, Brian Stark went 85 feet high with 64 containers (on top of two floors of concrete culverts) to create North America's tallest container building. source.image: Kirsten Dirksen All the containers have been. In the case of the recently opened IDA on McKinley, it's literal: At six stories, it is the tallest shipping container building in the country, but its display of sustainable living is what Stark hopes puts downtown Phoenix's latest cargotecture project on the map. "Doing this in an environment. He had already stacked containers two and three stories, but with his Ida apartment complex, Brian Stark went 85 feet high with 64 containers (on top of two floors of concrete culverts) to create North America's tallest container building. more He had already stacked containers two and three. These panels are ingeniously integrated into a folding system, allowing for swift and effortless deployment using innovative solar rails, spanning a total length of 120m (60m per side). This configuration provides a maximum solar area of approximately 720m<sup>2</sup>. The dual-sided unfolding design. In the heart of East London's Whitechapel neighborhood is an unexpected architectural statement: the world's tallest shipping container building. Designed by Patalab Architecture, this vertical tower isn't just turning heads for its industrial aesthetic — it's redefining what's possible with.

**Efficient**  
Higher Revenue

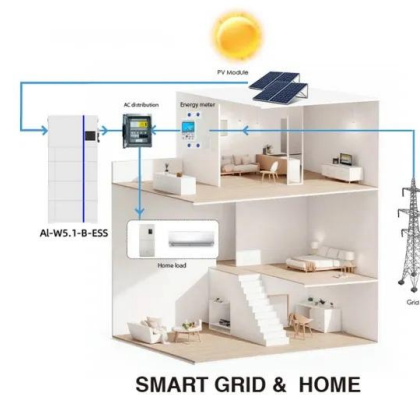

**Intelligent**  
Simple O&M

**Flexible**  
Abundant Configuration

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 11A, Compatible with High Power Modules
- IP65 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection
- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead Acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
