"Sunly" attracts 300 mln. EUR

The renewable energy producer "Sunly" has attracted financing in the amount of 300 million euros to facilitate the construction of 1,3 GW of solar, wind and hybrid parks with energy storage functions in Latvia, the entire Baltic region as a whole and also in Poland.

Two hybrid electricity production parks will be developed in Latvia

SIA ACCEDO will develop hybrid projects, combining solar, wind and battery energy technologies, in the territory of Latvia with a total capacity of up to 600 MW. This summer SIA ACCEDO concluded a long-term development services cooperation agreement with one of the world's largest wind power plant manufacturers for the development of hybrid

Sunly launches ambitious construction of 3 large solar parks in Latvia ...

All three solar energy parks in Latvia will be developed as hybrid parks, combining solar and wind energy along with a battery energy storage system (BESS). This approach will enhance the predictability of energy production and reduce grid connection and operational costs.
