

# **Industrial and commercial solar container power station operation and maintenance agreement**

## Overview

---

The O&M contract is a project agreement between the Asset Owner and the O&M service provider for the purpose of managing, operating, and maintaining the solar PV power plant. The O&M contract, together with the EPC contract, is a key document in any project. The statements contained in this RFP are made subject to the Reservation of Rights set forth in Appendix E of this RFP and the terms and acknowledgements set forth in the Proposal Submission Agreement. This OPERATION AND MAINTENANCE AGREEMENT (“Agreement”) is dated as of [\_\_], 202[\_\_] (“Execution. Our standard contracts and securitization resources include example contracts, operation and maintenance guides, and a mock filing with ratings agencies for photovoltaic (PV) systems. These resources were developed by an NLR-led working group—convened from the solar, finance, and legal. The Term is [insert] years from the Commencement Date. You are responsible for the provision of the Services in accordance with, and as more fully described in Schedule 1 (Scope of Services), including any Variation (Services). The Total Yearly Fee is: [insert price in Australian dollars]. See. By continuing, I agree to the and authorize you to charge my payment method at the prices, frequency and dates listed on this page until my order is fulfilled or I cancel, if permitted. This O&M Agreement ("Agreement") is for use between a cleantech (solar, wind, etc) system owner and a contractor. ("Project") and desires to contract for operation, maintenance and management of the Project, WHEREAS, Operator provides operation, maintenance and management services for [RET type] generation facilities and has agreed to provide those services for the Porject on the terms and conditions set. This section contains a set of considerations for the contractual framework of O&M services for the utility-scale segment, and more specifically, systems above 1 MWp. A complement to the technical specifications detailed in the previous chapters, the contractual framework described in this chapter.
