

Innolith energy battery Kiribati

Innolith energy battery Kiribati

Xerotech and Innolith Partner to Develop Non ...

Xerotech, a leader in battery pack technology for heavy-duty non-road mobile machinery (NRMM) is to join forces with new battery cell technology developer Innolith to launch the industry's first battery packs for ...

Innolith

We believe in the universal electric mobility, accessible to all, without the compromises of current conventional Li-ion batteries. It's a breakthrough battery cell technology that actually performs--now and in the future. Does it last longer? Yes. Can it go further? Absolutely. Is it safe? Much safer than any conventional alternatives.

Innolith High Energy 21700 (A) Battery Data, Model and Report

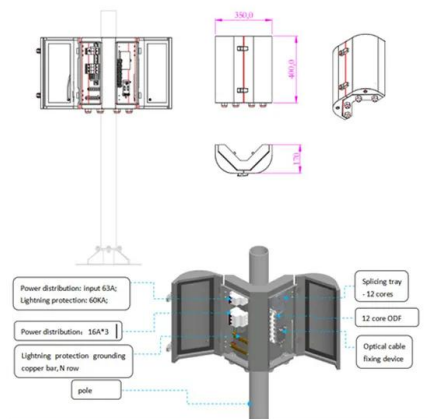

Get everything you need for the lithium-ion battery cell Innolith High Energy 21700 (A): Extensive measurement data in the total operation regime, a high-precision, physical battery model with global validity, and a teardown report that contains all details about materials and microstructures.

Innolith - more than one way to skin a battery market

The number of companies who say they have a

"breakthrough" in battery design that will overtake lithium ion batteries has now got to the point where we cannot count them all on the fingers of two hands.

Technology

A MIGHTY BATTERY TECHNOLOGY. Our current commercialisation focus is cylindrical format as the most common battery format, ready to be manufactured anywhere in the world. We have already produced full cell 21700 B-samples that are well accepted by variety of partners across multiple e-mobility industries.

Xerotech and Innolith Partner to Develop Non-Flammable Battery ...

Xerotech, a leader in battery pack technology for heavy-duty non-road mobile machinery (NRMM) is to join forces with new battery cell technology developer Innolith to launch the industry's first battery packs for electrification of a ...

Innolith Company Profile 2024: Valuation, Funding & Investors

Developer of lithium-ion battery technology designed to improve battery performance and safety. The company offers batteries with features such as extended lifespans, faster charging times, ...

Innolith Reaches Commercialisation Point with Promise

Innolith, a European developer of Li-ion battery cell technologies, announces the commercialisation of its I-State battery technology platform for use in electric vehicles (EVs) and e-mobility applications.

Integrating the Power of Sustainability with I-State Battery

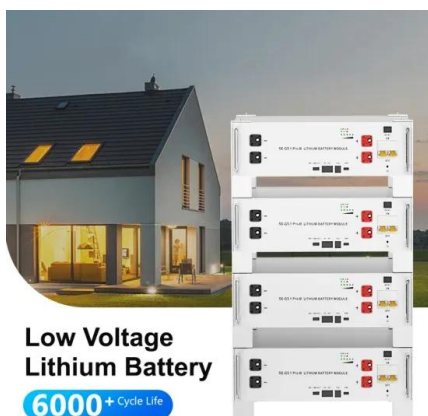

...

Innolith has designed its batteries for reuse, minimizing waste. The technology allows a 20% reduction in rare-earth metal usage per kWh and utilizes locally-produced, fully recyclable electrolytes, significantly curbing carbon emissions.

Low Voltage Lithium Battery

6000+ Cycle Life

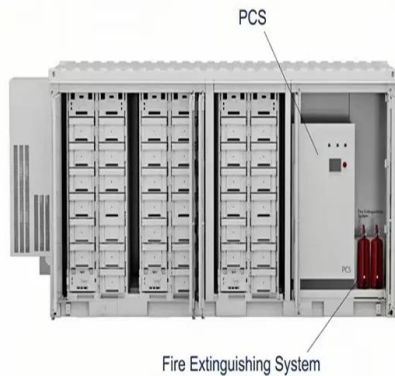

Innolith Reaches Commercialisation Point with Promise ...

Innolith, a European developer of Li-ion battery cell technologies, announces the commercialisation of its I-State battery technology platform for use in electric vehicles (EVs) and e-mobility applications.

Innolith High Energy 21700 (A) Battery Data, Model and Report

Get everything you need for the lithium-ion battery cell Innolith High Energy 21700 (A): Extensive measurement data in the total operation regime, a high-precision, ...

Freedom

Basel, Switzerland, 13 th June 2023 - Innolith, a European developer of Li-ion battery cell technologies, today announces the commercialisation of its I-State battery technology platform for use in electric vehicles (EVs) and e-mobility applications. Using an entirely new battery chemistry, I-State will cut EV costs and increase vehicle range

Innolith AG Profile

WE CHAMPION SUSTAINABLE BATTERY CELL INNOVATION TO LIBERATE E-MOBILITY. From the start, we meant business. Our ambition is bold - we target 99%+ of the battery market. We have pioneered an entirely new battery technology, now independently validated (because claims are nothing without fact), that is already compatible with the future.

Innolith - more than one way to skin a battery market
