Lots of oil but no power: how Iran ran low on energy

According to the IMF, Iran spent \$163bn in explicit and implicit energy subsidies in 2022, which amounted to more than 27 per cent of GDP -- the highest share of the economy of any country in

Iran's energy crisis hits 'dire' point as industries are forced to shut

22 · A lesser-known factor has exacerbated the energy crisis in 2024. In February, Israel blew up two gas pipelines in Iran as part of its covert war with the country.

Iran, Islamic Republic of 2022

Iran's primary energy consumption has almost doubled since 2000 and continues to grow, mostly due to urban population growth, development of energy-consuming industries (e.g. oil refinery, petrochemicals, iron, steel, cement), and growing demand for transportation and electricity.

Iran's Renewable Energy Aspirations and Geopolitical Challenges

Pezeshkian's stewardship of Iran's green energy strategy will be essential to achieving its overarching strategic objective of year-round energy security. Although it has plans to increase its total clean energy generation to 30 GW by 2030, Iran's current renewable energy capacity is nowhere near this mark .

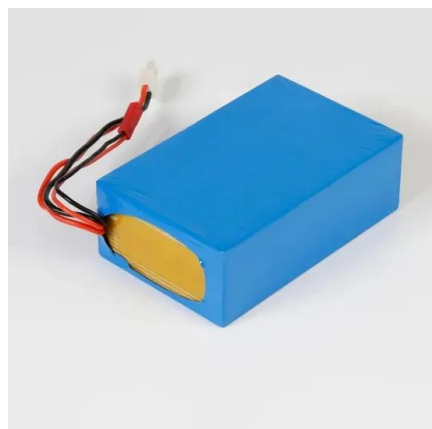

Iran's Shifting Discourse on Nuclear Weaponization:

At the end of August 2024, a leaked, confidential report from the International Atomic Energy Agency (IAEA) raised concerns about the ongoing development of Iran's nuclear program. The report criticized Iran's lack of cooperation with the IAEA and warned that, if Iran ...
