Iraq's energy sector

Iraq's Energy Sector: A Roadmap to a Brighter Future is the International Energy Agency's first in-depth analysis of the country's energy sector since 2012. It examines the problems affecting Iraq's power sector and offers recommendations for how to address the situation, including the potential role of renewables.

Enabling Iraq's energy independence

The challenge of developing Iraq's prodigious domestic gas resources has thrown the issue of energy independence into sharp relief. For the government of Prime Minister Mohammed Shia al-Sudani, the need is to improve electricity services that could support economic development, improve government services and build better security.

A ROADMAP TO PREPARE IRAQS' POWER SECTOR FOR ENERGY ...

4) Increase energy efficiency and energy conservation, including the development of energy service companies; 5) Improve electricity sector good governance and performance via a clear ...

GE Vernova and Mass Group Holding Celebrate

We are committed to further enhancing efficiency, flexibility, and sustainability within Iraq's energy sector. This modernization project is part of the Iraqi Ministry of Electricity's broader strategy to ...

BP, Iraq Advance Redevelopment of Kirkuk Oil and Gas ...

3 · BP Plc and the Iraqi government took another step toward reviving one of the OPEC member's most prolific oil and gas resources, the Kirkuk field.

Iraq needs renewables, but they won't solve its power problems ...

Iraq boasts a strong potential renewable energy base: It has significant solar irradiance levels, economically-viable wind speeds in some areas, and hot springs that could present an opportunity for the geothermal development (pending technical assessments).
