Oman: Solar investment opportunities

Oman holds great solar potential. Traditionally, the country's economy has focused on the use and export of fossil fuels, primarily oil and gas. Recently, this balance has begun to shift to renewables, with Oman adopting a decarbonisation target that should see it reach net-zero emissions by 2050.

Oman's solar transition roadmap - pv magazine International

SolarPower Europe says in a new report on solar development in Oman that the nation will need to install a minimum of 13 GW of solar by 2030 to meet its ambitious net-zero targets.
