## Overview

---

THE COMPANY, LLC. For decades, governments have privatized state-owned enterprises (SOEs) to improve their performance and lower financial risk. SOE performance had often been disappointing. Reforms for SOEs attempted to improve their financial and operational performance and to operate on the strength of their financial discipline: Panama City isn't just about the Canal anymore. This tropical hub is becoming a global financial center. LTD CORP. AND, INC. THE, INC. L.L.C., INC. THE COMPANY, LLC. This paper examines the challenges governments in Latin America face to control their state-owned enterprises (SOEs). It argues that, absent privatization, governments can rely on a variety of reforms to address some of the main problems affecting SOEs. These problems are divided into corporate governance, financial discipline, and operational efficiency. The government may assume full or partial ownership of a state-owned enterprise, which is usually allowed to take part in specific activities. There are many SOEs around the world and examples include Fannie Mae and Freddie Mac, which are sponsored by the US Government. In most countries with an aging population, SOEs have gained prominence in recent years. High-profile corruption scandals, such as *Petróleo Brasileiro S.A. (Petrobras)* in Brazil, *Sonangol* in Angola, *Eskom* in South Africa, and *1 Malaysia Development Berhad (1MDB)* in Malaysia have attracted global attention and put the issue of SOE corruption at the top of the global agenda.
