Island Green Power presents plans for 500-MW solar ...

UK renewable energy developer Island Green

Power (IGP) on Tuesday unveiled early-stage plans for a utility-scale solar and battery energy storage system (BESS) with a potential generation capacity of up to 500 MW ...

Egypt to develop 10 GW of renewable energy projects by 2028

...

Egypt has announced an ambitious plan to establish 10 gigawatts of renewable energy capacity by 2028 as part of its National Platform for the NWFEE Program. The initiative, unveiled during the inauguration ceremony of the Abydos 1 Solar Power Plant in Aswan, represents a major milestone in the country's journey toward a sustainable energy future.

MEET THE TEAM

Since Ian co-founded Island Green Power in 2013 he has lead the company to become one of the world's largest and most successful Solar Developers with over 1 GW of plants developed. Under his leadership, Island Green Power has grown from being a UK focused developer to a developer with operations in 5 markets who are well positioned to lead

Projects

Our expertise is industry leading. We operate around the world sourcing, assessing and developing potential sites. We are proud of our proven ability which delivers industry leading solar farms and battery storage projects. ? So far 21 of the projects we developed are successfully

operating, with more under construction.

DCO decision on 480MW West Burton solar NSIP delayed until 2025

Solar PV developer Island Green Power has seen a development consent order (DCO) decision delayed by the UK government for its 480MW West Burton project located across Lincolnshire and Nottinghamshire.

480MW West Burton Solar moves to next stage of development

Island Green Power's proposed 480MW West Burton Solar Project has progressed to the next stage of its development consent, with the planning inspectorate having closed its examination. The examination closed on 8 May, and the planning inspectorate will pass their recommendation regarding the project to the Secretary of State in early August.

Island Green Power presents plans for 500-MW solar project in UK

UK renewable energy developer Island Green Power (IGP) on Tuesday unveiled early-stage plans for a utility-scale solar and battery energy storage system (BESS) with a potential generation capacity of up to 500 MW near Long Stratton in South Norfolk, England.

Keeping the power on: our future energy technology mix - Island Green

Island Green Power's mission is to help countries across the world to increase their solar energy usage, making more renewable energy possible, saving thousands of tonnes of CO2, and helping the UK on the journey to net zero by 2050. IGP's development pipeline is currently targeted to ...

Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 50% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

Intelligent Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart ITC Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead Acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation

About IGP

Island Green Power identifies suitable sites, prepares the initial designs, and brings the project through the local planning process. If you'd like to discuss a current or future project, we'd love to hear from you.
