

# Italian solar container project suspended

## Overview

---

Italian transmission system operator (TSO) Terna said that Italy's first energy storage capacity procurement mechanism (MACSE) will be postponed until September 2025. Italian TSO Terna has decided to postpone its first auction for the procurement of energy storage capacity until. So, you've probably heard the news: a major Italian energy storage project suspended its operations last month. Cue the collective groan from renewable energy enthusiasts. But why did this happen?

Was it technical hiccups, political drama, or something else entirely?

Let's unpack this like a. Italian transmission system operator (TSO) Terna said that Italy's first energy storage capacity procurement mechanism (MACSE) will be postponed until September 2025. Italian TSO Terna has decided to postpone its first auction for the procurement of energy storage capacity until later. Italy and. A court in Italy has partially cancelled the suitable areas decree (aree idonee in Italian) for ground-mounted renewables, while questioning the legality of the agricultural decree law. Issued in June 2024 by the Italian Ministry of the Environment and Energy Security, the decree contained. In force since 16 May 2024, Decree 63/2024, which according to rumor has totally banned solar PVs on agricultural land, is characterized by all the above-mentioned features of urgency, complexity and compromise. According to its description, Decree 63/2024 allegedly sets forth " urgent provisions. The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now account for approximately 35% of all new utility-scale storage deployments worldwide. North America leads with 40% market. Approved in November 2024 with a self-funded budget, this 600MW/600MWh behemoth in Jiangsu Province is like a Swiss Army knife for the power grid: storing solar and wind energy, stabilizing voltage, and even moonlighting as an emergency backup [1] [3]. Why does this matter?

Well, imagine trying to.
