From Waste to Energy. How SEaB Energy Could Help the

SEaB Energy believes waste has potential and should be used in a better way: its Anaerobic Digester - turning waste into biogas and then into energy or heat - could play a key role in the transition towards more "circular cities".

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW/115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

SEaB Energy Ltd

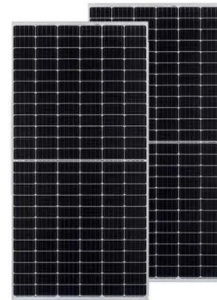

SEaB Energy is a manufacturer of small scale and micro AD systems. SEaB's MuckBuster® and FlexiBuster(TM) small-scale AD systems are housed in a transportable container, enabling them to be easily delivered and installed, and convert organic and food waste into electricity.

Flexibuster :BiogasWorld

SEaB Energy's FLEXIBUSTER(TM) was designed to disrupt the way we deal with waste and waste disposal. FLEXIBUSTER(TM) decentralises waste processing power and allows businesses and communities to host and operate their own

waste-to-energy ...

SEaB Energy

SEaB Energy designs, develops and manufactures micro anaerobic digestion systems which create biogas, water and fertiliser. The patented units can be combined with Combined Heat & Power units, Biogas Fuel Cell or Biogas boiler to use the gas. The fertiliser is available in liquid or solid bagged format. The company is headquartered in London.

Waste Management Europe Conference

The European exhibition and conference for Waste Management and the Circular Economy took place in Italy, from 21 to 23 June. The conference focused on rethinking waste management and sustainability with attendees from 20 countries, including 150 exhibitors and 100 speakers.

SEAB Energy (SEAB Power Ltd) - an Unreasonable company

Across the globe, every 1,000 tons of waste processed results in 400 tons of carbon emissions. SEaB spent over £6M developing our founder's invention into the first and leading micro waste-to-energy plants built in shipping containers, that use anaerobic digestion to transform organic waste into biogas in a process that emits no greenhouse gases.
