Ivory Coast Launches First Solar Power Plant

Ivory Coast inaugurates its first solar power plant in Boundiali, marking a shift towards renewable energy. The project aims to reduce reliance on fossil fuels and double its capacity to 80 MWp by 2024. It employs 350 locals and serves as a model for sustainable development in the region.

Ten IPPs in Run for Developing 60 MW Solar PV Plants in Ivory Coast

The selected IPPs will build solar photovoltaic power plants capable of delivering 60 MW to the Ivory Coast's national grid. These projects are in line with Ivory Coast's target to generate 42% of its electricity from renewable energy by 2030.

Ivory Coast Boosts Renewable Energy with New Solar Projects

The Ivory Coast is set to begin construction of the \$63.5 million Ferke Solar power plant in Sokoro, which will have an installed capacity of 52 MW. Announced by government spokesperson Amadou Coulibaly in April, the project will commence in the second quarter of 2024 and is expected to be operational by the third quarter of 2025.

Côte d'Ivoire Partners With PFO AFRICA For Landmark 52 MWp Solar

...

This collaboration marks a historic milestone, as it paves the way for the design, financing, construction, operation, and transfer of a colossal 52 MWp photovoltaic solar power plant. Notably, this project stands as the largest solar power plant construction initiative undertaken by an Ivorian independent power producer (IPP).

First photovoltaic solar power plant in Ivory Coast

Inaugurated in June 2023, the plant consists of 68,000 solar panels on 36 hectares, with the aim of doubling this figure by the end of 2024 to reach a capacity of 80 MWp. The project, with a total cost of 75.6 million euros, is financed by Côte d'Ivoire, a German loan and a grant from the European Union.

Ivory Coast bets on solar in clean energy drive

The sun beats down from a cloudless sky on the town of Boundiali, where Ivory Coast's first solar power plant embodies the drive to embrace clean energy without abandoning fossil fuels.

RMT builds a 37.5 MWp solar power plant and installs an energy ...

As part of its drive to diversify electricity generation sources and increase the share of renewable energies in its energy mix (45% by 2030), Ivory Coast commissioned RMT to build the country's very first photovoltaic solar power plant, with a capacity of 37.5 MWp, spread over 69,440 550 Wp solar panels and 168 inverter-strings of 250 kVA.

Decarbonization in Ivory Coast: TotalEnergies and L'Ivoirienne ...

TotalEnergies and L'Ivoirienne d'Hévéa (IDH) have signed a partnership to develop a 5 MW solar photovoltaic power plant to supply IDH's production site with green energy. This project aims to install more than 8,200 photovoltaic panels, reinforcing IDH's commitment to sustainable development and the energy transition.
